The first mention I could find in the town records of this cemetery, which is the oldest one in Jamaica, was under date of November 5, 1668, when at a town meeting it was agreed that John Wascot was to fence the burying place, with good and sufficient five rail fence before the middle of the next March. He was to fence it ten rods square and to have four pounds current pay for his pains and labor.

Under date of December 5, 1670, at a town meeting it was decided that William Brinkley was to have a piece of land on the west side of the burial place, leaving a sufficient highway between his fence and Beaver Pond.

The History of Queens County says, that when the old Presbyterian Church was torn down in 1813, the bones of Rev. Patrick Gordon, who died July 28, 1702 and those of Rev. William Urquhart who died the last of August 1709, and those of the two wives of Rev. Thomas Poyer, whom had been buried under this church, were gathered up, put in a box and buried in the village cemetery. If this be true, no markers tell us of their final resting place.

In 1857, Nicholas Ludlum of New York, purchased three acres of land, east of the old burying ground and built a chapel, at his own expense in memory of his daughters.

This cemetery, containing the remains of the pioneers of this place, was incorporated in 1879 under the name of The Prospect Cemetery. It is sad to record that many old stones have been used to form a walk and new graves are being made over the old ones.

• *Staphylococcus aureus* (Staph aureus) is a Gram positive cocci in clusters. It is a facultative anaerobe and is found in the skin, nose, and throat. It is a common cause of skin infections, such as abscesses, boils, and impetigo. It can also cause more serious infections, such as pneumonia, sepsis, and food poisoning.

1. *Chlorophyll a* (Chl *a*) and *Chlorophyll b* (Chl *b*) were determined using a spectrophotometer (Shimadzu UV-1601U) at 663 nm and 646 nm, respectively. The concentrations of Chl *a* and Chl *b* were calculated using the following equations: Chl *a* (mg g<sup>-1</sup>) = 12.7 (OD<sub>663</sub> - 2.13 OD<sub>646</sub>) and Chl *b* (mg g<sup>-1</sup>) = 22.9 (OD<sub>646</sub> - 0.21 OD<sub>663</sub>). The total chlorophyll content (mg g<sup>-1</sup>) was calculated as the sum of Chl *a* and Chl *b*.

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. "Hark from the tomb a doleful sound!  
The cry invades my ear,  
Alas! Here lies an only son  
Now in his eighth and twentieth year.  
Hear what the voice from Heaven proclaims  
That nature must decay and must these  
Active limbs of mine, lie mouldering in  
the clay.  
Fare you well my children dear,  
My sister and my friends,  
I hope in Heaven ypu will appear  
Where all things have their end."

"Hand from the cold and cruel world  
The one invader of my soul  
Alone, alone, alone, alone  
Now in the night and loneliness  
I hear the voice of Heaven's angels  
The angels sing and sing and sing  
Active in the night, the angels sing  
The angels sing  
There you all my dear ones  
My dear ones, my dear ones  
I hope in Heaven you will appear  
There all things I love and hold dear"
